

# Trump announces energy platform consistent with GOP energy agenda

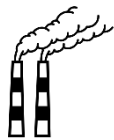

## Key points of President Trump’s America First Energy Plan

Eliminate the Climate Action Plan

Eliminate Waters of the U.S. rule

Overturn climate change based regulations on power plants

Save the coal industry

Allow for more extraction of oil, gas and coal on federal lands and offshore

Cancel international climate agreements

Refocus the EPA on keeping the air and water clean

Achieve energy independence from OPEC

### Analysis

- The administration has stated that the revenues from energy production will be used to rebuild roads, schools, bridges and public infrastructure across the country
- In addition to achieving independence from OPEC, the plan states that the U.S. must develop an energy relationship with Gulf nations
