

# The 'skinny repeal' being considered by the Senate would lead to 16 million additional uninsured compared to current law

## 'Skinny repeal'

## Provisions of the 'skinny repeal'

- Eliminate the individual mandate, which requires all Americans to have health insurance or face a penalty
- Remove the employer mandate, the requirement that companies with 50 or more full-time employees must provide health insurance or pay a fine
- Repeal the so-called Cadillac tax, an excise tax on expensive insurance plans offered by employers that is due to go into effect in 2020
- At least one of those provisions—defunding Planned Parenthood—has already been shot down by vote so it's unlikely that provision would show up in a serious reconciliation bill
- The CBO scoring of the 'skinny repeal' was requested by the Democrats and isn't a comprehensive score but rather a score of the different amendments

\*There is a lot of speculation about what is actually in the skinny repeal, most senators are not quite sure of what they're voting for.
