

Life In Brief

Current Title: CEO

Work History:

- Founder, CEO, and President, Amazon 1994-2021
- Founder, Bezos Earth Fund, 2020-Present
- Founder, Blue Origin, 2000-Present
- Bezos Expeditions, 2003-Present
- Senior Vice President, D.E. Shaw, 1990-1994

Quick Summary

Known for his aggressive business practices and long term thinking, Bezos has risen to market supremacy and become the wealthiest person in the world

- Learned the importance of data driven business while working at a hedge fund on Wall Street in the early 90s, where he researched internet-based businesses
- Started Amazon as an online book store that offered over a million books at low prices
- Used disruptive strategy of forgoing profits in the early years of Amazon to focus on long term market share domination that includes consumer goods, web services, and more
- Amazon success driven by Bezos’s obsession with customer experience; includes empty chair at meetings to represent the customer’s needs
- Evaluates performance against hundreds of measurable goals, drawing criticism from workers who find it difficult to meet increasing metrics while following all safety protocols
- Passionate about space exploration and sees it as the only way humans can continue to grow and innovate without destroying Earth

- Announced in February 2021 that he would step down as CEO of Amazon in Q3 of 2021 to focus on Blue Origin, The Washington Post, and his philanthropic endeavors

Approach and Motivations

Drive for domination through relentless innovation

- Credits summers spent at his grandfather’s ranch in Texas for teaching him to be self-reliant and innovative
- Focused on long-term thinking and goal setting, often setting 7-10 year time frames for projects
- Motivated by deep fear that humans will be forced into a stagnant state once energy resources on Earth have been depleted
- Strives to follow “adventure and fellowship” and states that abiding by these principles is the best way to be proud of your decisions later in life

Policy Position and Areas of Focus

Life-long interest in space exploration, focuses philanthropy and the environment

Business Practices: Savvy data collector and powerful tax lobby

- Obsession with customer data has allowed Amazon to track thousands of indicators used to create new products and offerings, such as the Kindle and expanding into new markets like video streaming
- Amazon had effective federal tax rate of -1% in 2018 after successful lobbying on the 2017 tax bill, targets local government to repeal internet sales tax

Space: *Long interest in colonizing space*

- Expressed goal of building space hotels and colonies and turning Earth into a national park in high school graduation valedictorian speech in 1982
- Believes Blue Origin is his most important work; sees colonizing space as essential to human survival and has invested an estimated \$1 billion of his wealth a year in the company
- Motivated by the concern of using up the limited supply of energy available on Earth, claims humans will be forced to stop growing if we don't leave the planet
- Developing re-usable space vehicles to help lower the cost of going into space

Climate Change: *Recognizes Amazon's expansive supply chain and logistics operations impact on the environment*

- Launched Bezos Earth Fund in February 2020 and pledged to donate \$10 billion in the form of grants to help fight climate change
- Announced in 2020 that Amazon was using a fleet of all electric delivery vehicles in India
- In 2019, Bezos announced that Amazon would meet climate goals set out in the Paris Climate Agreement 10 years ahead of schedule

Core Communities

Well-connected across global leaders and influencers

Key Mentors: *Relationships that have shifted his career*

- Took classes by Gerard K. O'Neill, author of *The High Frontier*, in college and credits his ideas on space exploration as an influence

- Credits former boss David Shaw at D.E. Shaw as a key figure in helping him understand potential of the internet
- Close relationship with Don Graham, former editor of the Washington Post convinced Bezos to purchase the paper

World Leaders: *Frequently meets with world leaders to discuss Amazon, sometimes with contention*

- Has had difficult relationship with Prime Minister Modi as Amazon expands in India, who has enacted stricter regulations on foreign companies' operations
- Pulled out of a \$2.2 billion deal with Saudi Arabian Crown Prince after allegations that Saudi agents killed a columnist at the Washington Post
- Met with President Emmanuel Macron to discuss climate policy goals for Amazon

Connections in Government: *Amazon lobbyists worked in powerful offices*

- Iram Ali is current Public Policy Lead at AWS, former White House Liaison at Dept. of Defense
- Pres. Obama Press Secretary Jay Carney is current Head of Global Corporate Affairs at Amazon
- Kathryn Edelman is former Digital Services Expert at OMB, current Amazon lobbyist
- Paul Misener is former Chief of Staff for Harold Furchtgott-Roth at FCC, current VP of Global Public Policy at Amazon
